Subject: Microsoft Settlement

This settlement is a disgrace. Not only does it not effectively dismantle the giant Microsoft Corporation, it allows them to basically operate the exact same manner with only a few modifications to their corporate structure. I use multiple platforms including Windows and other Microsoft Products, so this is not a biased submission. Yet again Microsoft will be able to buy their way through this, thus eliminating the effective competitive market that the antitrust laws were established to protect. A much harsher penalty needs to be sought.

Sincerely,

Lee Sammartino
